

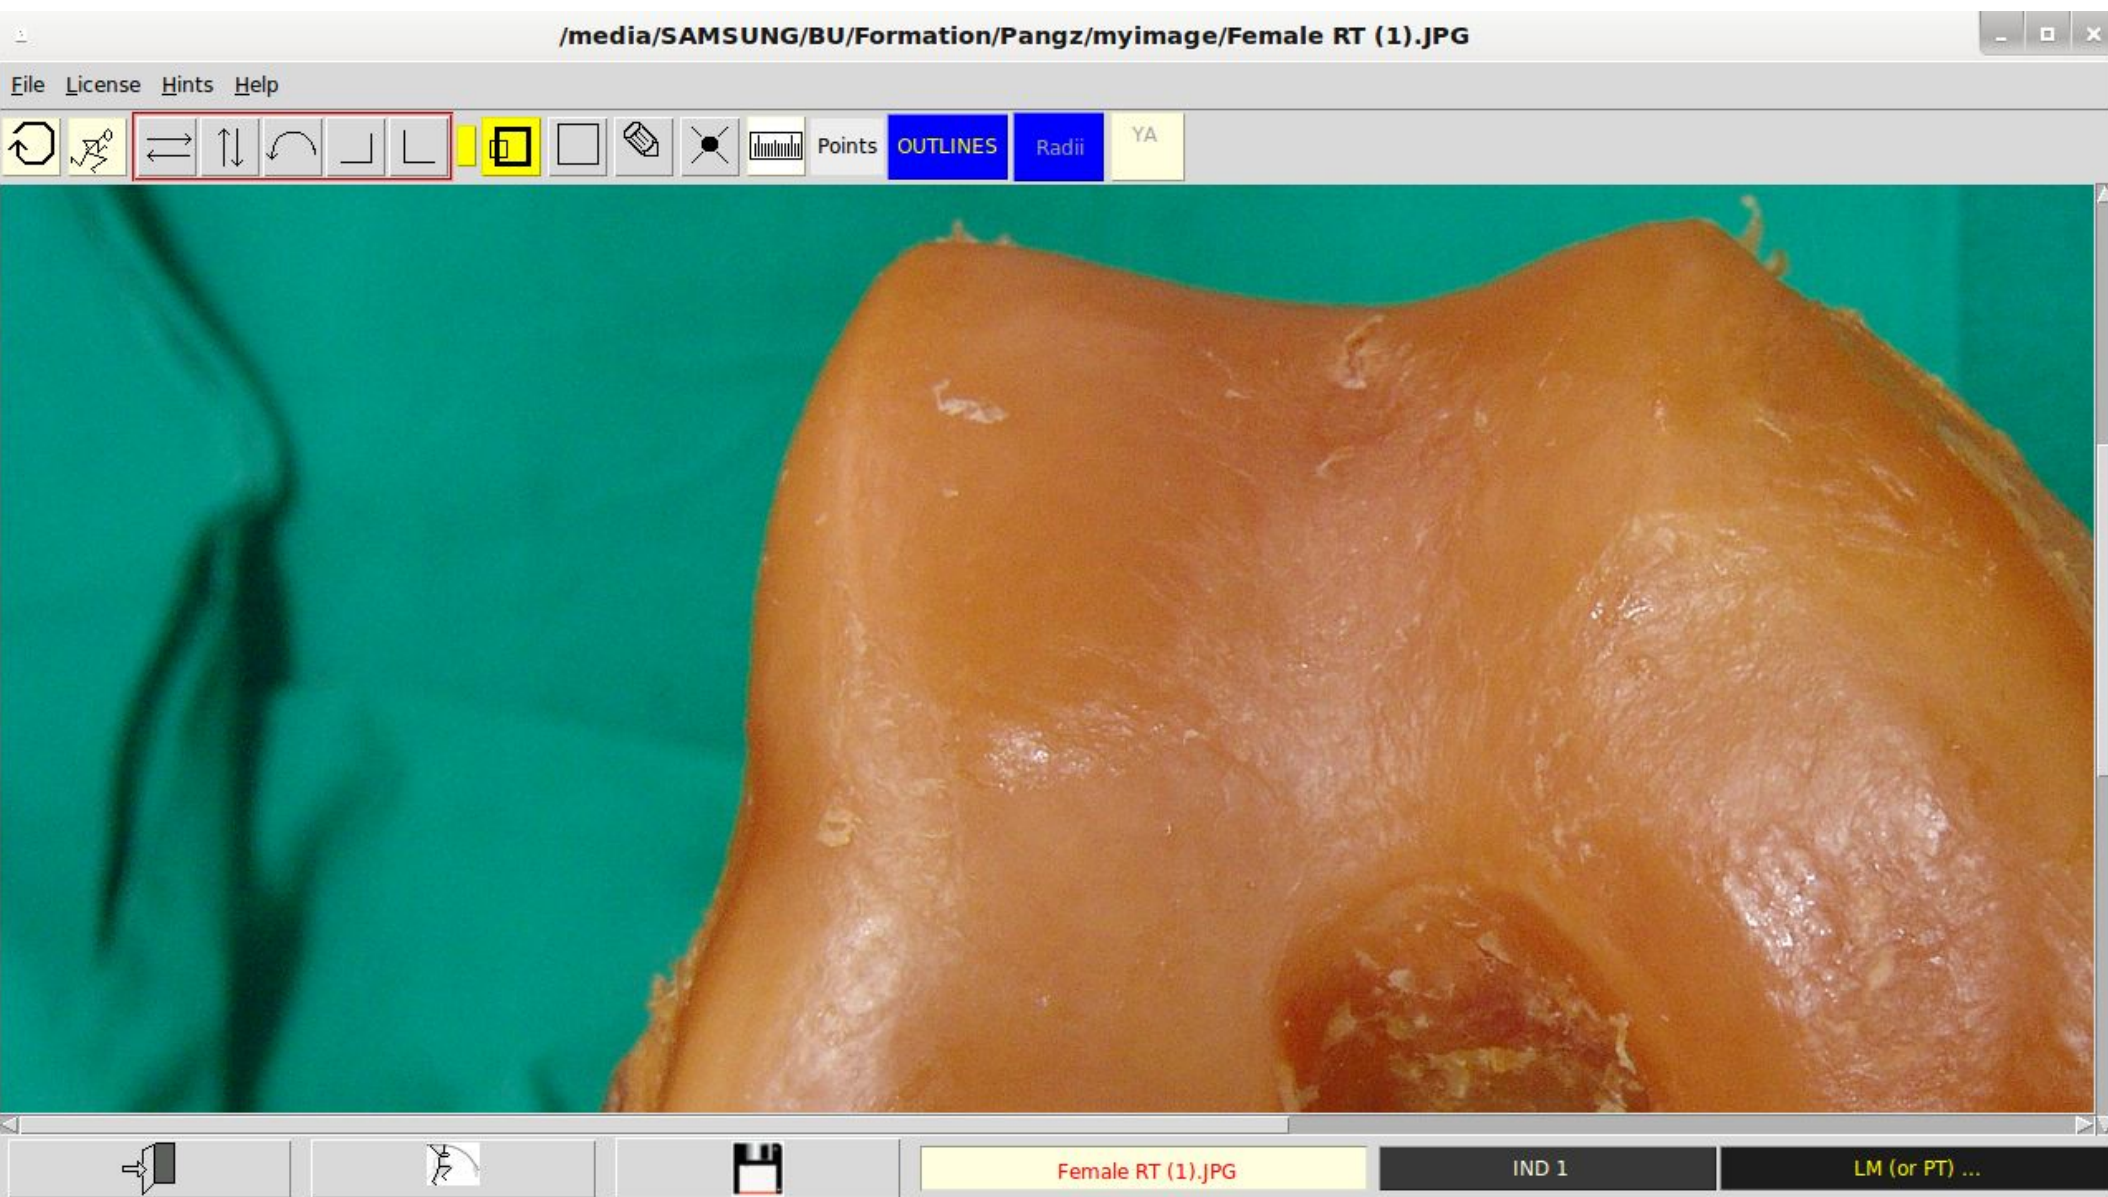

Image is too big. Just hit key « d » (see next slide)

« d », for « decreasing » the size of the image. Now the image fits the COO window

To capture an outline contour, please select a number of RADII (here 600),
Then hit the « start » button

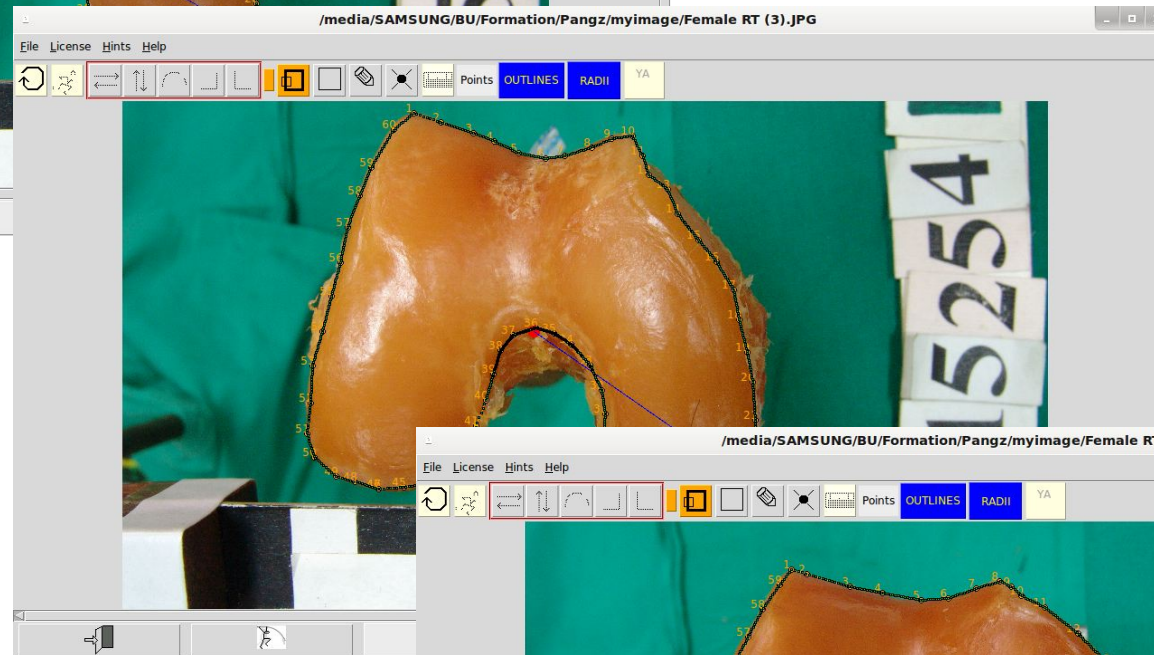

Delimit the outline contour by clicking along the border ;
the number of your « clicks » does not matter

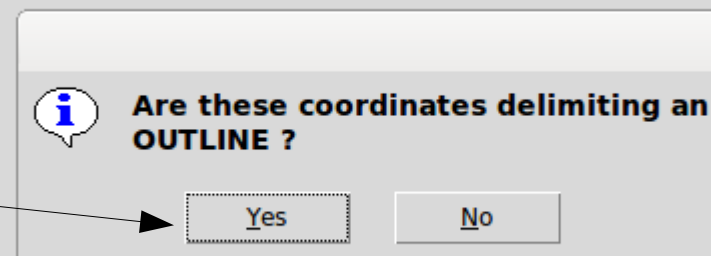

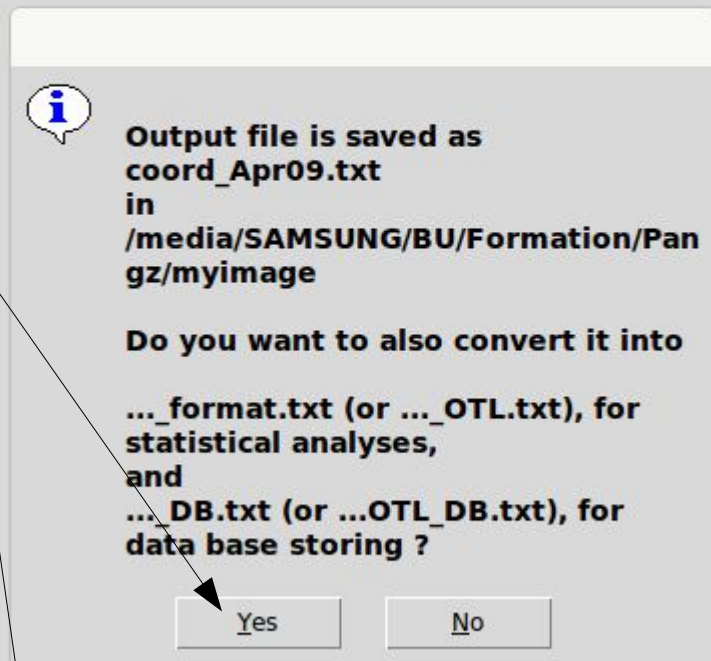

After each capture,
Hit the RADII button

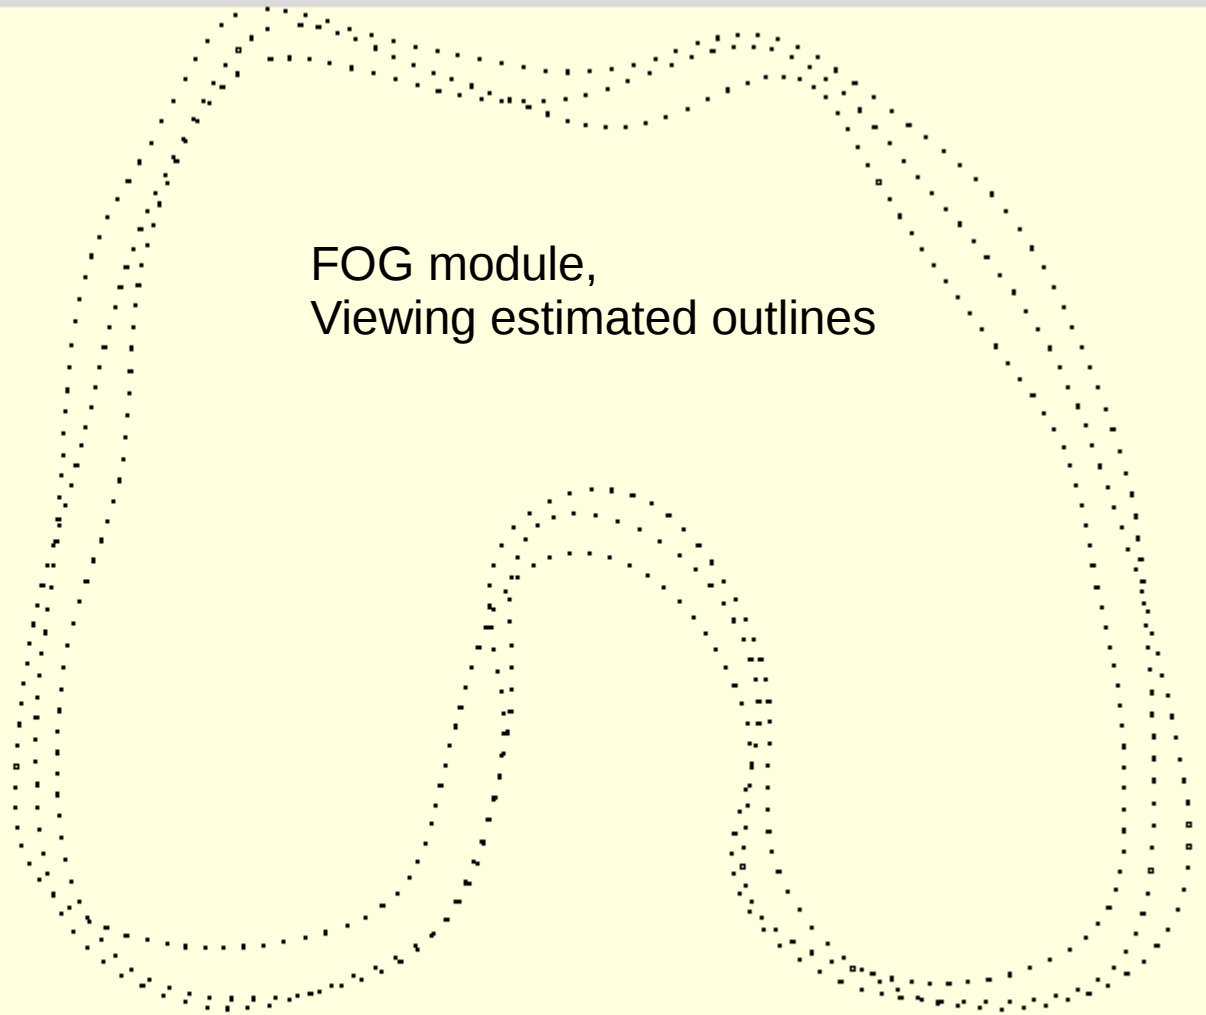

At the end of the session,
Hit the bottom left button
and
answer « yes » two times.

FOG module,
Viewing estimated outlines
